Salt-Free, Hypochlorous Acid Sanitation -1-800-424-2278 - [www.PureSpacesSW.com](http://www.PureSpacesSW.com)

## WHAT IS HYPOCHLOROUS ACID (HOCl)?

Hypochlorous acid is produced through a process called electrolysis where salt is electrically separated into its two main ions, sodium and chloride. Hypochlorous Acid is also produced in the human body where it is used by our immune system to destroy invading germs and pathogens.

Hypochlorous acid is 100x more effective at disinfecting than chlorine bleach, yet safe for all living organisms. **Our process removes any salt from the final product leaving it noncorrosive and safe to use on almost any surface.**

Grocery and Foodservice

Hospitals and Medical

Gyms and Fitness Centers

Schools and Daycares

## WHY USE HYPOCHLOROUS ACID INSTEAD?

- ✓ Pure Spaces patented the only "Salt-free" HOCl preventing any stains, residue or corrosion.
- ✓ Completely safe to use anywhere on any surface. Will not harm humans or animals.
- ✓ Traditional sanitizing agents take minutes to kill pathogens. (HOCl) kills on contact or within seconds.
- ✓ Can be produced on site, reducing cost and labor.
- ✓ Can be used across many industries to sanitize any area where humans are present.

Pure Spaces solutions can be used in virtually **any** environment that requires regular and effective cleaning and sanitation. Our services are proven to kill all known bacteria, superbugs and fungus.

Pure Spaces products are Green Seal certified. Proven the safest and most sustainable in the marketplace.

## ELECTROSTATIC TECHNOLOGY ENSURES TOTAL COVERAGE

1. Atomized droplets pass an electrode inside the nozzle. Negatively charged electrons are attached to the droplets.

2. The droplets will reverse direction and move against gravity to coat even hidden surfaces.

3. The negatively charged droplets are carried in an air stream towards the surface. Since the surface has a natural positive charge, the droplets are magnetically attracted to the surface.

## A NEW ERA OF CLEAN

Our solutions are not only more powerful than traditional chemicals, but our patent-protected systems have revolutionized the very process of generating natural cleaning and disinfecting solutions for your home and business.

We use a substance that originates in nature and yet is the only one of its kind. Our products are salt-free. This means we can thoroughly disinfect and sanitize without risk of corrosion caused by salt-based products.
